This is a test of changing the titlepage with dblatex on asciidoc. The change of the footer is also done here. Everything interesting for this is in the *.sty file. Generate this using:

```
a2x -fpdf -L /PATH/TO/ASCIIDOC/TEXT/FILE --dblatex-opts="-p /PATH/TO/CUSTOM/XSL/STYLESHEET  
-s /PATH/TO/CUSTOM/STY/STYLESHEET"
```
